## S206E-II

Optimum for the complicated workpieces up to 20mm (optional 26mm). Reinforced milling capability.

## BW329ZE

32mm size BW series, which drastically reduces the machining time of the complicated workpieces with the independent opposed tool posts.

## BW209ZE-II

Ultimate reduction of cycle time on the complex workpieces with independent opposed tool posts and Z3 axis movement on rear tool post.

## PO34E

Opposed gang tool Swissturn for micro parts less than 3mm. Easy operation with dedicated useful functions.

## HS327-III-5AX

Modular type rotary tool can be mounted on the B-axis swiveling tool post. 5-axis machining with B-axis.

## B0326E-III

Reinforced milling capability. B0 series Swissturn correspond up to 32mm bar.

## B0386E-III

Reinforced milling capability. B0 series Swissturn correspond up to 38mm bar.

### CNC Lathe

## HS38MH-5AX

Perfect integration of machining center and Swissturn with 5-axis simultaneous control.

## MOBSYE-II

CNC lathe with Y-axis milling capability and back spindle.

### Turning Center

## TMA8FE

Turning center with 5-axis simultaneous control. Widely correspond to the complicated workpieces.
